

SAT · 2023 · 2025 · 2026 · ISSUED 27 OCTOBER 2026

How Elmy measures the distance

Every score, taken in one place.

Where each score in the TestPrep Effect is taken, and how Elmy, the learning platform behind TestPrep, turns a diagnostic into a plan, a plan into lessons, and lessons into a record.

FROM THE FIRST DIAGNOSTIC TO THE OFFICIAL SAT

How Elmy measures the distance

Where each score in the TestPrep Effect is taken, and how Elmy, the learning platform behind TestPrep, turns a diagnostic into a plan, a plan into lessons, and lessons into a record.

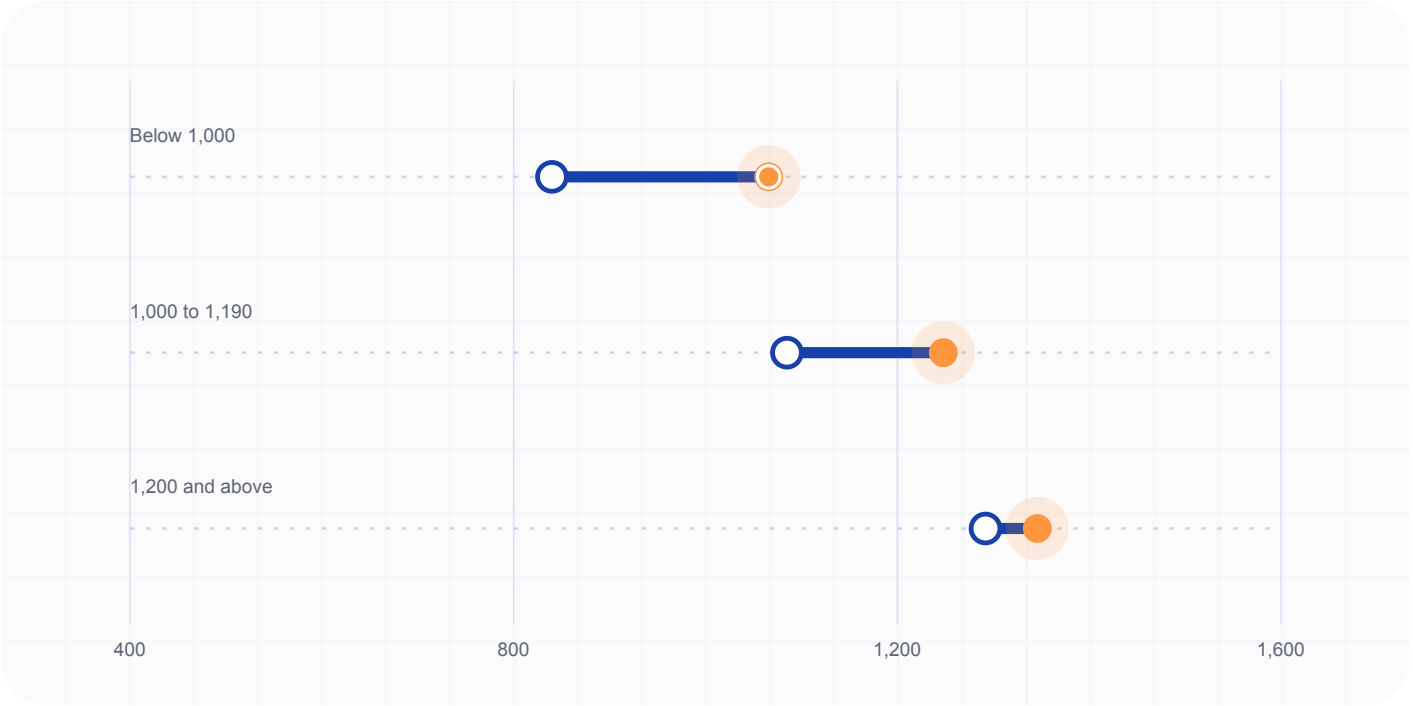

WHAT THE RESULTS SHOW

Where each score in the TestPrep Effect is taken, and how Elmy, the learning platform behind TestPrep, turns a diagnostic into a plan, a plan into lessons, and lessons into a record.

INSIDE

02 The first score is a profile
03 From the profile to a plan
04 Every check, beside the first one
05 Who sees it
06 The two scores that count

Every number in the TestPrep Effect starts in Elmy.

Elmy is the learning platform behind TestPrep, part of House of Prep. It runs our diagnostics, plans and reports.

Practice between lessons at the Hamra centre.

The TestPrep community · Hamra, Beirut

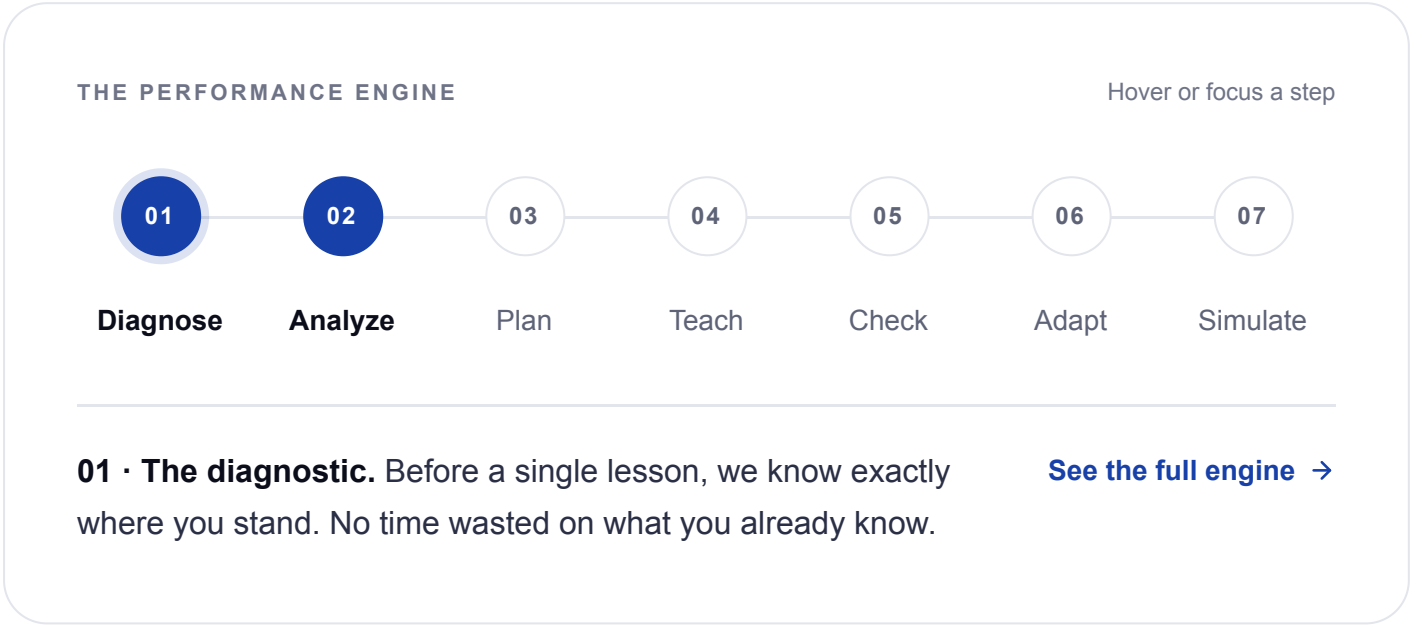

02 · THE TESTPREP EFFECT

The first score is a profile

The diagnostic is a full-length test in the SAT's format, under test conditions, before the first lesson.

Elmy records it question by question. Each answer is tagged by skill, topic and difficulty.

So the baseline is not one number. It is a profile of where the marks went.

03 · THE TESTPREP EFFECT

From the profile to a plan

The ranking of gaps is read from the student's own answers, not the class average. It looks different at 900 and at 1,300:

- **Under 1,000**, the list is long and the gaps are wide.
- **Above 1,200**, it is short and the gaps are narrow.

The plan is built from that ranking and the target. That is why the groups are built by level, and the practice sets are built from the results.

04 · THE TESTPREP EFFECT

Every check, beside the first one

The lessons go to the gaps. After each one, a short check shows what is fixed and what slipped.

The checks and the full practice tests are recorded the same way, next to the diagnostic. A slip is seen the week it happens.

When the data changes, the plan changes with it:

- a skill that slipped moves up the list
- the practice sets change
- at the halfway test, the groups are reset, so a student who has closed the foundations moves up

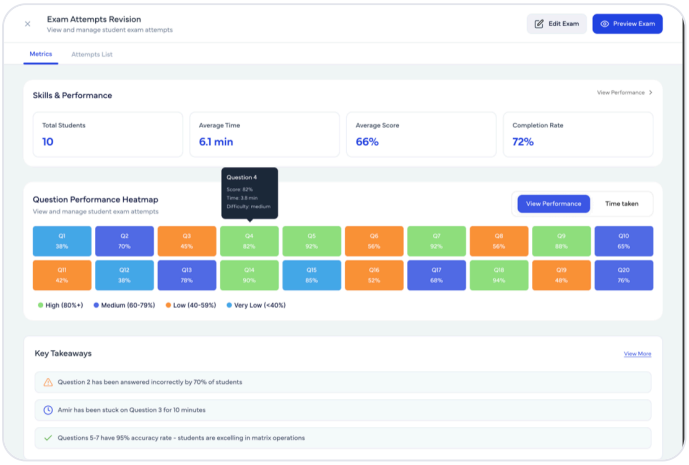

elmy ELMY, SCREEN BY SCREEN

What the student, the instructor and the parents see.

01

The diagnostic, tagged question by question

Each answer is recorded by skill, topic and difficulty, so the plan knows what to teach.

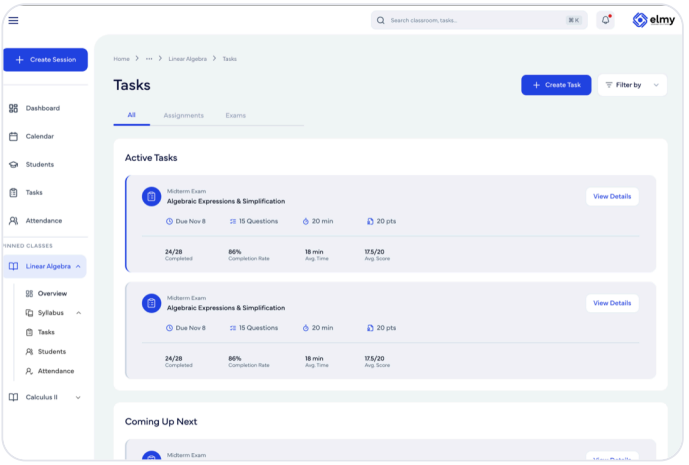

An exam, question by question: where the class loses marks.

02

Practice at your level

Sets built from your results, not the class average, with a short check after each lesson.

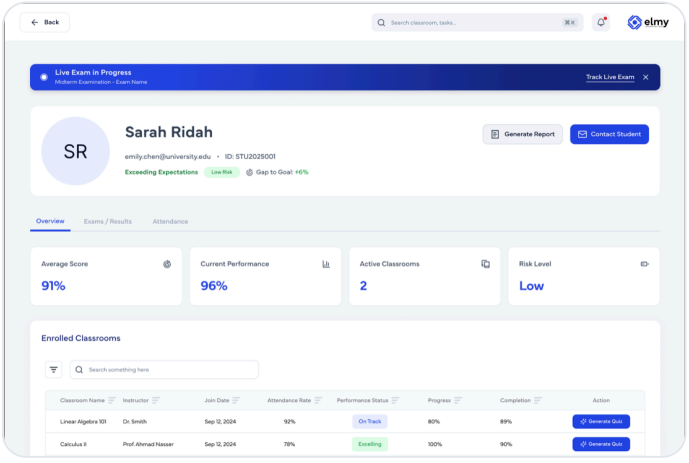

Tasks and exams for a class, with completion and average score.

03

Progress you and your parents can see

Scores, attempts and reports, any day, in one place.

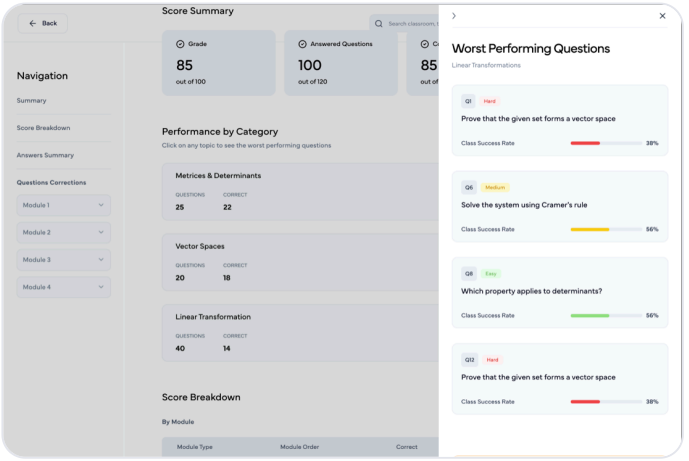

A student's overview: score, performance, risk level.

04

The score report

Performance by topic and the questions to review, read against the first diagnostic.

A score report: performance by topic, the questions to review.

05 · THE TESTPREP EFFECT

Who sees it

The instructor, the student and their parents.

They can open the scores, the attempts and the reports any day.

Two students working through a practice set at the Hamra centre.

The TestPrep community · Hamra, Beirut

06 · THE TESTPREP EFFECT

The two scores that count

elmy MEASURED IN ELMY

Where each score is taken.

Diagnostics, lessons, checks and full-length tests all run through Elmy, the learning platform behind TestPrep.

Your diagnostic, tagged question by question. Each answer is recorded by skill, topic and difficulty, so the plan knows what to teach.

Practice at your level. Sets built from your results, not the class average, with a short check after each lesson.

Progress you and your parents can see. Scores, attempts and reports, any day, in one place.

DAY ONE

The diagnostic

A full-length test before the first lesson, every answer tagged by skill, topic and difficulty.

AFTER EACH LESSON

A short check

Shows what is fixed and what slipped, so the plan can change.

HALFWAY

A full test

Progress measured again, the plan updated, the groups reset.

THE FINISH

The final full test

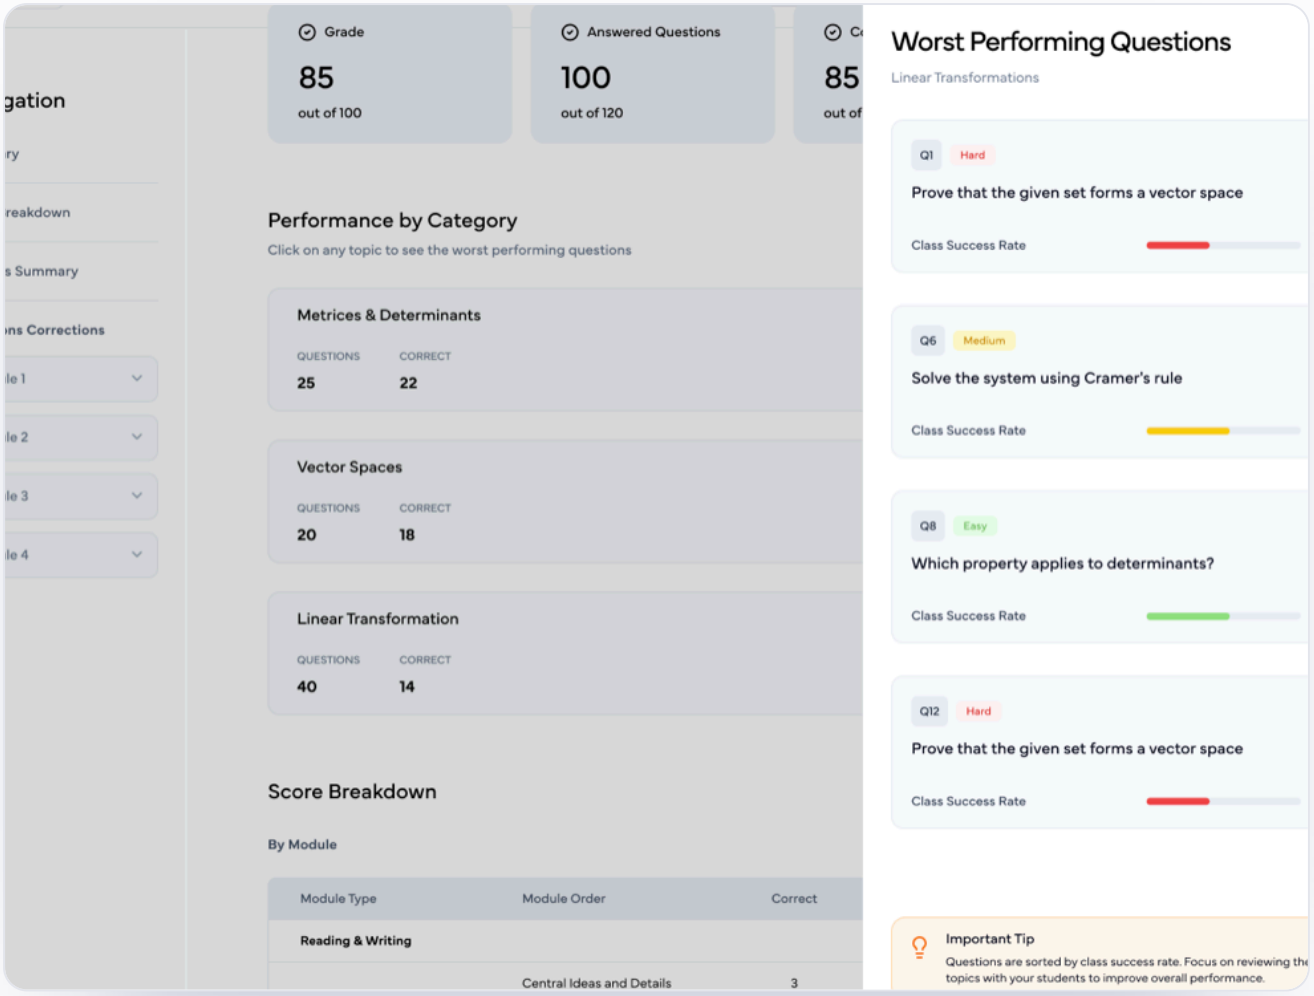

Real conditions, start to finish, with a complete score report.

AFTER THE COURSE

The official SAT

The score the student sends us, read against the first diagnostic. The distance is the Effect.

The Effect counts the ring and the dot: the first diagnostic and the official SAT. The checks and practice tests in between steer the plan; they are not in any average on this site.

A score report in Elmy: performance by topic, the questions to review.

Only the first diagnostic and the official SAT are in the Effect.

The checks and practice tests steer the plan. A practice gain is not an official gain, so none of them appears in an average on this site.

When the official SAT arrives, Elmy reads it against that first diagnostic. The distance is the TestPrep Effect.

DELIVERED BY TESTPREP

Test Prep

One team, in your corner.

Every number in this report comes from students taught by TestPrep and measured on the Elmy platform, from the first diagnostic to the official SAT.

Precision in the plan. Mastery at every step.
Belief in the student. That is the TestPrep difference.

DISCOVER THE FAMILY

The same thinking, everywhere students grow

The precision behind this report runs through everything House of Prep makes: brands that help students discover who they are, prepare with intent, and perform when it counts.

weguide.™
Helps students discover who they are before choosing who they'll become.

prep me.
Guided study and structured prep for every student.

taleb
University, made manageable.

elmy
A practice, assignment and progress platform for students.
